

Paraeducators

Paraeducators may be provided for an academic department or teaching team to assist teachers with clerical and instructional duties so that the teachers may have more time for planning and direct work with the students. Paraeducators may be employed to provide supervision of students under the direction of the building principal and perform other duties as set forth in the accompanying regulation.

Paraeducators may be either directly employed by the District or sourced to the District as a contracted service. Appropriate orientation and individual performance reviews will be conducted annually for paraeducators as applicable.
