

*Revenue from Federal Sources*

All funds approved for federal projects operated under the agency of the District shall be paid to the treasury of the District.

All projects shall contribute to the attainment of adopted district goals and be compatible with district procedures.

The District administration shall retain the direction, supervision and control over all phases of any program.

Project proposals shall include an accurate picture of the phase-out schedule and the District commitments for continuance. The District shall comply with all requirements involved in the acceptance of the project and the projected continuance.

The proposed educational program shall not cause an excessive burden to the existing or any future budgets, and financing shall be provided, either by district funds or project funds, so that support will be maintained continuously for the duration of the project. Projects shall be funded for a three-year period, except for special instances where there are compelling reasons why this limitation should be waived. Projects shall be funded sufficiently to support all direct and indirect costs.

Purchase of equipment for projects shall be done within federal guidelines, maintaining required inventories and reallocation to other projects and/or schools as needed.

All new proposal ideas will be developed only after Board approval, and proposals shall be submitted to the Board for final approval, insofar as practical, at least thirty (30) days prior to the deadline date for making application for the program. All projects shall follow the established procedures for the District for federal and/or private, foundation or donation funded projects as far as negotiations, written commitments from the contracting agency, procurement of personnel and material, administration, evaluation and reporting are concerned.
