

*U.S. Presidential Requests to Address T/E Students*

Whenever a sitting United States President requests to address District students by means of live media during the school day, the Superintendent will make every attempt to honor such a request in a live environment or as soon as reasonably possible, except for the following conditions:

- 1) No such request will be honored during a presidential election year and
- 2) No such request will be honored if it is the third such request in any one school year.

Requests for access in times of clear national urgency, when the public interest would require immediate communication between the President of the United States and the American public, are not subject to the conditions above.
