

## Family Symptom Screening Checklist

TESD students and staff should not come to school or work if they have any COVID-19 symptoms, regardless of whether they are vaccinated. Symptoms can appear 2-14 days after an exposure. At present, the CDC identifies the symptoms listed below. Please note this is an update from last year in which symptoms were categorized. If your child has one of these symptoms, you should keep your child home from school.

- Fever (Oral >100.4 degrees F, Axillary/Temporal >99.5 degrees F) or chills
- Cough
- Shortness of breath or difficulty breathing
- Fatigue
- Muscle or body aches
- Headache
- New loss of taste or smell
- Sore throat
- Congestion or runny nose
- Diarrhea
- Nausea or vomiting

### **By sending your child to school, you are affirming:**

- My child does not have any of these symptoms.
- My child has not been directed to quarantine.
- My child is not otherwise ill or sick.
