

Tredyffrin/Easttown School District
Kindergarten Family Life
Parent Information Sheet

Your child is about to begin a health unit on the topic of family life education. Our Family Life Unit is based on the philosophy that parents are the primary health educators of their children. We see the role of the school as supporting and supplementing the parent's role by encouraging students to discuss what they have learned in class with their parents at home. To reinforce this message, parents are encouraged to become involved in their child's family life lessons.

The Family Life Unit for kindergarten includes these topics:

- Similarities and differences between boys and girls
- The continuing growth of a child
- When I Was Young experiences
- Different kinds of families

The first home activity is included with this information sheet. Please discuss the topics on the chart with your child and have them draw the pictures in each category. We will display each child's pictures and use them to elicit a discussion on the similarities and differences between boys and girls. Please return the chart by: _____

Please contact your child's teacher if you have any questions.
